SUPERSEDES: Environmental Management Policy EMS-PO-0001 Rev 3							

POLICY STATEMENT

MARTA is committed to preserving and improving the environmental well-being of the community; providing a safe and healthful workplace; and enhancing the overall quality of life of the people living in the region. This is accomplished by:

- Setting Environmental Objectives:** MARTA establishes and maintains environmental objectives appropriate to its organizational context, environmental conditions, environmental aspects, and compliance obligations, and evaluates progress toward those objectives through monitoring and measurement.
- Protection of the Environment through Prevention of Pollution:** MARTA applies appropriate practices, technologies, and controls to prevent pollution, and to avoid, reduce, or control the creation, discharge, or release of pollutants and waste, thereby reducing adverse environmental impacts.
- Fulfilling Environmental Compliance Obligations:** MARTA is committed to fulfilling applicable compliance obligations, including federal, state, and local environmental laws, regulations, permits, ordinances, and other requirements to which MARTA subscribes.
- Continual Improvement:** MARTA is committed to continually improving its Environmental Management System and environmental performance through consideration of changing environmental conditions such as climate change and climate resilience that may impact planning, operations, maintenance, and infrastructure activities.

 POLICY	ISSUE DATE 08/31/2026	Reference No. EMS-PO-0001 REV 4	Page 3 of 3
TITLE: Environmental Management Policy			

- **Environmental Responsibility:** MARTA promotes environmental awareness and responsibility among employees and persons working for or on behalf of MARTA, including environmentally responsible work practices and spill prevention.

Purpose and Application

This Environmental Management Policy provides the framework for establishing, implementing, maintaining, and continually improving MARTA's Environmental Management System and associated environmental programs.

MARTA establishes and maintains environmental management programs and controls to support fulfillment of applicable environmental compliance obligations and to address relevant environmental aspects, impacts, risks, and opportunities.

MARTA incorporates pollution prevention, environmental protection and stewardship, climate resilience, and resource conservation into relevant decisions concerning the location, design, construction, operation, and maintenance of MARTA facilities and infrastructure.

MARTA supports achievement of its environmental objectives by:

- Incorporating environmental management considerations into phases of design, construction, and operations.
- Identifying and evaluating environmental compliance obligations and associated risks and opportunities, and establishing appropriate controls and actions to address them.
- Establishing and maintaining documented policies, procedures, and controls necessary to support the EMS and fulfill applicable environmental compliance obligations and other requirements to which MARTA subscribes.
- Developing environmental targets and objectives for relevant environmental aspects, and periodically evaluating environmental aspects, impacts, risks, opportunities, and performance to support continual improvement.

This Environmental Management Policy applies to MARTA activities, facilities, and operations within the defined scope of the EMS and is communicated to employees, contractors, and other persons working for or on behalf of MARTA whose activities may affect environmental performance. The policy is made available to interested parties and the public through appropriate MARTA communication channels.
