Why Bus Rapid Transit (BRT)?

Frequent Service

Buses every 10 minutes during peak periods to keep you moving

Predictable Travel

Designed to support dependable trips

Key Destinations

Serving employment, healthcare, shopping, education, and community destinations

Better Links

Better access and connections to local MARTA routes

What is Bus Rapid Transit (BRT)?

BRT is a premium bus service designed to help people get where they need to go more easily. With frequent service, rail-like stations, and predictable travel, BRT combines the convenience of a bus with features often associated with rail transit.

How Does BRT Work?

Station Amenities

BRT offers stations and features that speed up boarding and improve rider experience: real-time arrival screens, off-board ticketing, and bike racks.

Real-Time Arrival Screens

Bike Racks

Transit Signal Priority

Transit signal priority technology connects transit vehicles to traffic signals, reducing the amount of time buses are sitting at red lights.

Off-Board Ticketing

Dedicated Operating Lanes

BRT systems includes “fully dedicated” bus lane sections along the route, in which only public transportation and emergency vehicles may operate, avoiding congestion.

Image is for illustrative purposes only. Final station design is in development and is subject to change.

BRT in Action: *RAPID A Line* (Summerhill BRT)

The *RAPID A Line*, which opened in summer 2026, includes a 5-mile roundtrip route that connects Downtown Atlanta to the Capitol Gateway, Summerhill, Peoplestown, and the Atlanta Beltline.

Supports continued growth and sustainability for the **\$850M+ already invested** in Summerhill developments

As of August 2026

**More Connections.
More Convenience.
More Opportunity.**
